Summary

Full-Stack Engineer with 6+ years of experience building production healthcare platforms for clients in the United Kingdom, United States, UAE, Israel and Norway – clinical workflow and documentation systems, care marketplaces, medical-record analysis and coaching platforms. TypeScript across the stack: NestJS and Node.js REST APIs, React and Next.js web applications, React Native (Expo) mobile apps published to the App Store and Google Play, and PostgreSQL. Strong in multi-tenant architecture, asynchronous processing (Redis, BullMQ, RabbitMQ, Pub/Sub), real-time features over WebSockets and Socket.IO, and AI/LLM integration (OpenAI and Anthropic APIs, Vercel AI SDK, RAG with pgvector). Comfortable owning features end to end in distributed, English-speaking teams, with GDPR-compliant data handling.

Education

Cherkasy State Business College
2020 – 2024

Bachelor of Science, Software Engineering · Cherkasy, Ukraine

Northern Virginia Community College
2023 – 2024

Diploma, Web Design and Development · Virginia, USA

Languages

English – C1 (certified); Ukrainian – Native

Skills

Languages: TypeScript, JavaScript (ES6+), HTML5 / CSS3, SQL, Python (FastAPI), PHP

Backend: Node.js, NestJS, Express.js, Fastify, REST APIs, OpenAPI / Swagger, tRPC, WebSockets (Socket.IO), BullMQ, RabbitMQ, Google Cloud Pub/Sub, Cloud Tasks, JWT authentication, RBAC, multi-tenant architecture, event-driven architecture, background workers, Strapi, WordPress, GraphQL / Apollo, OAuth 2.0, Django, Nodemailer

Frontend: React, Next.js (SSR), React Router, Redux, Redux Saga, Zustand, TanStack Query (React Query), RxJS, Tailwind CSS, SCSS, shadcn/ui, Radix UI, Material UI (MUI), Chakra UI, Bootstrap, Bulma, Storybook, Framer Motion, GSAP, Three.js / React Three Fiber, Vite, Webpack, PWA, i18n, Zod, jQuery, Electron.js, Redux Toolkit, MobX, Ant Design, i18next, Axios, Moment.js, Luxon

Mobile: React Native, Expo, Expo Router, push notifications, App Store and Google Play publishing

AI & LLM: OpenAI API, Anthropic API, Vercel AI SDK, RAG pipelines, vector search (pgvector), Ollama, Groq API, Deepgram, AssemblyAI, GitHub Copilot, Claude Code, Codex, LLM evaluation, RLHF data generation, agent evaluation, rubric design, grading calibration, failure-mode analysis, Cursor, Gemini

Payments & Integrations: Stripe, Paysera, Cliniko, Nookal, Meddbase, Semble, Splose, Dentally, ArcGIS, Mapbox, SCORM, EDI, Finvalda, Ivesk.lt, Auth0, SendGrid, Shopify API, Twitter API, Line API

Databases & ORMs: PostgreSQL, PostGIS, pgvector, MySQL, MongoDB, Redis, Elasticsearch, Firebase / Firestore, Supabase, Prisma, TypeORM, Drizzle ORM, Sequelize, Google Cloud SQL, DynamoDB

Cloud & DevOps: AWS (S3, ECS, RDS, CloudFront), Google Cloud (Cloud Run, Cloud SQL, Pub/Sub, Cloud Functions), Vercel, Docker, Kubernetes, Nginx, MinIO, CI/CD, GitHub Actions, GitLab CI, Git / GitHub / GitLab, Sentry, Terraform, DigitalOcean, CircleCI, PM2

Testing & Quality: Jest, Vitest, React Testing Library, Playwright, Puppeteer, ESLint, AES-256 encryption, Helmet, GDPR-compliant data handling, Mocha, Chai, Cypress (e2e)

Tools: Postman, Figma, Prettier, Husky

Methodologies: Agile, Scrum, Kanban, pair programming, AI-agent-driven development, Feature-Driven Development (FDD), Behaviour-Driven Development (BDD)

Professional Experience

Motics — AI Operating System for Healthcare Clinics

Full-Stack Engineer · United Kingdom · 3 months

- Worked on the AI medical scribe's asynchronous processing: built durable job projections, recovery for stranded recordings, and parity fixtures that keep generated summaries consistent across model changes.
- Built and extended a FastAPI integrations service handling provider credentials, OAuth flows, webhooks and UK regional shard routing.
- Delivered EHR / practice-management integrations with Cliniko, Nookal, Meddbase, Semble, Splose and Dentally.
- Shipped the React Native mobile app to the App Store and Google Play, including TestFlight and Android releases.
- Prepared frontend and mobile engineering standards covering security, UI guidelines and testing flows.

Stack: TypeScript, React, React Native (Expo), Node.js, Python (FastAPI), PostgreSQL, Stripe, OAuth 2.0, webhooks, LLM APIs

Welspot — AI-Driven Healthcare Management Platform

Full-Stack Developer · United States · 1 year

- Engineered a healthcare management platform that streamlines clinical workflows end to end: patient and staff management, appointment scheduling, clinical documentation and automated generation of medical documents.
- Integrated AI-assisted clinical note generation and automated document handling into the clinician's own workflow.
- Built the patient and staff modules on role-based access control with JWT-based authorisation, so every permission is enforced server-side.
- Developed and documented scalable REST APIs with Swagger on PostgreSQL and Prisma, and implemented Elasticsearch for rapid fuzzy search across millions of clinical notes and medical records.
- Implemented real-time notifications, secure internal messaging and live state synchronisation with Socket.IO and RabbitMQ.
- Designed background processing pipelines on Redis queues for asynchronous work, and integrated cloud file storage for secure medical document management.

Stack: TypeScript, JavaScript, React, Node.js, NestJS, Express.js, REST APIs, Prisma, PostgreSQL, Redis, RabbitMQ, Elasticsearch, Socket.IO, Swagger, AWS, AWS S3

1plus1cares — Care Marketplace

Full-Stack Developer · United Kingdom · 2 years

- Built a healthcare marketplace matching caregivers to patients on care needs and service availability, with a multi-role model separating caregivers, clients and staff by role-based access.
- Implemented messaging, calling and secure live video consultation between caregivers and clients.
- Delivered online appointment scheduling and integrated payments, so booking a visit and paying for it are one flow.
- Optimised search so caregiver discovery and matching stayed fast as the directory grew.
- Shipped the React Native (Expo) app to iOS and Android through App Store Connect, on NestJS services and PostgreSQL hosted on AWS, with CI/CD pipelines automating builds and releases.

Stack: TypeScript, React, React Native (Expo), NestJS, Node.js, PostgreSQL, AWS, CI/CD, App Store Connect, Git

Prepaire — Health-Record Analysis Platform

Full-Stack Developer · United Arab Emirates · 1 year

- Built a healthcare application that reads uploaded medical documents and returns the patient's current health state as a dashboard of specific issues rather than raw report text.
- Delivered web and mobile from React and React Native with state and data kept synchronised across both, on a mobile-first interface built for usability and accessibility.
- Implemented secure upload and processing workflows for medical documents, with explicit progress and feedback states for analyses that run long.
- Integrated the analytics services and health-data pipelines behind the dashboard, and tuned processing for large documents.

Stack: TypeScript, React, React Native, Redux Toolkit, TanStack Query (React Query), React Router, SCSS, Three.js / React Three Fiber, Storybook

Getinshape — Online Coaching Platform

Full-Stack Mobile Developer · Norway · 6 months

- Built a multi-tenant coaching platform serving coaches and their clients, from heart-failure rehabilitation through to competitive athletes.
- Modelled training programmes and diet plans as reusable recipes, exercises and templates a coach composes rather than re-enters.
- Implemented a subscription system covering plans, recurring subscriptions and digital products.
- Delivered the React Native app for iOS and Android with push notifications for workouts, meal plans and subscription changes, offline access to programmes and plans, and social sharing of progress.
- Added engagement and performance analytics to show which parts of the app to improve next.

Stack: TypeScript, React Native (Expo), Redux, Redux Persist, Material UI, Node.js, MySQL

Aspra — Founder Network & Learning Platform

Full-Stack Developer · Israel · 2 years

- Built a networking platform for early-stage founders: matching with co-founders, shared workspaces, startup resources and the community around them.
- Delivered the learning side of it on Next.js and NestJS – course creation, quizzes, SCORM modules, progress tracking and role-based access for administrators, instructors and students.
- Shipped web, iOS and Android from one shared codebase, so the experience stays consistent across devices.

- Implemented an interactive task engine with automated testing, multi-stage review and structured instructor grading, plus real-time chat for community interaction.
- Designed and documented REST APIs on PostgreSQL and TypeORM, with AWS S3 and CloudFront behind globally distributed video streaming.
- Secured the platform with JWT and OAuth2 authentication, and set up CI/CD pipelines for automated builds, testing and deployment.

Stack: TypeScript, React, Next.js, React Native (Expo), NestJS, Node.js, PostgreSQL, TypeORM, WebSockets, AWS S3, AWS CloudFront, Docker, CI/CD, Mocha, Chai

Additional Information

Based in Alicante, Spain (CET).

Work authorization: Spanish residence and work card (TIE/NIE) scheduled for issue in October 2026.

I consent to the processing of my personal data for recruitment purposes in accordance with the UK GDPR and the Data Protection Act 2018.
